

## County Championships 2022 Update

The preparations for the County Championships 2022 are now fully underway. Therefore, we can update you all on the current plans for how the championships will operate.

### **Schedule of Events**

The programme of events will follow a similar format to the championships held in 2020 – the main change is around the relays where these will be held as mixed events.

It was felt it was important to run the events in the standard format so all clubs can ensure all their swimmers are present at the same time and we can create the best atmosphere possible.

### **Spectators**

It is with sadness that we need to announce that the County Championships will be held without spectators. This has not been an easy decision but have tried to ensure the swimmers come first and can compete in a competition as near to normal as possible as we fully appreciate this is the pinnacle of the year for most swimmers.

We know that parents/guardians will be disappointed not to be able to attend, but we are making plans to live stream the competition for sessions 3 to 10. The full details of the live streaming will be available in the new year.

### **Volunteers**

We are looking for a few volunteers to help us with each session – the full details are available on the county website.

Your help will be greatly appreciated and will allow us to run the competition as efficiently and effectively as possible.
